

Alumina Substrates (96%)

We provide both blank alumina substrates and laser-processed alumina substrates. The alumina substrates are used widely in Hybrid Integrated Circuit (HIC), network resistance, glass-glazed potentiometers, semiconductor congealers and power modules.

The following blank substrates are our standard sizes. For custom dimensions or laser scribing and drilling, please call 520-514-1100 for details.

Blank Substrates

Length		Width	
inch	mm	inch	mm
1	25.4	1	25.4
2	50.8	2	50.8
3	76.2	3	76.2
4	101.6	4	101.6

Thickness of substrates available at
0.02"/0.025"/0.03"/0.040"(0.508/0.635/0.762/1.00mm)
